

Salsa, Cumbias, Chas, Son

Within a very short time Corazón Latino has become one of Switzerland's top Latino-acts. Already in its first year of existence they have played many clubs and well known Open Airs, as the Caliente Festival.

Corazón Latino play sounds and rhythms from Colombia, Cuba and other parts of Latin America. Vocals, percussion, bass and acoustic guitar are the trademark of Corazón Latino.

With their new CD recorded with Einar Escaf (former grammywinning producer with Carlos Vives) they have returned to the cradle of their music which is the coast of Colombia. Their music sounds as if it was played in the streets of South America. There is "pura alegría", contagious and full of life. An extraordinary musical event for listeners and dancers.
